

Video-Endoscopy of the Vocal Tract

This is a unique experience, not to be missed by professional voice users and potential professional voice users.

Friday July 2, 2pm – 5pm
Conservatorium of Music, Sydney
With Dr John Tomich & Helen Tiller

This session is the culmination of a 5 day Estill Voice Training Course where participants have learned to voluntarily control the structures in the vocal tract which contribute to changes in voice quality.

Audience members will be able to observe:

- the larynx and vocal tract during video-endoscopy with an introduction and explanation by Dr John Tomich, ENT.
- the use of bio-feedback as a tool to facilitate change in inefficient vocal function and voice quality – watch while vocal function changes!
- voluntary control of changes in the larynx and vocal tract to facilitate better understanding of healthy voicing, regardless of style

Fee:

- \$50 for observers (only those who have completed the 5 day course will be endoscoped)

Registration essential by contacting Jenny Caire at jcaire@optusnet.com.au
or phone 0404 919 854

Venue details will be provided on registration.
